Mariposa County Prevention of Relational Violence Plan

Goal 4: To increase the community's capacity to implement prevention efforts through improved data collection, data sharing and resource sharing.

Resources and Inputs	Activities - critical success factors	Outputs (Products/Direct Results)	Outcomes (Short-Term or Mid-Term Change/Benefit)	Impact (Long-term Change/Benefit)
• Mariposa County Domestic Violence Coordinating Council • Community Link • Existing county and state agency data bases	• Identify data to be collected and the collecting sources • Select data gathering tools that meet needs of agencies dealing with relational violence • Train agency personnel to use the data reporting tool(s). • Encourage sharing of data and develop a process for submitting data • Use Community Link to store, catalogue and disseminate data collected. • Encourage sharing of grant demographics, narratives and prevention strategies to avoid duplication of effort.	• Within 1 year, county agencies will support the development of a data gathering tool that assesses relational violence. • Within 2 years, county agency officials will fund research to identify the most appropriate items to include the data gathering tool that assesses relational violence • Within 3 years, county agency officials will allow public comment and review of the items to include in the data gathering tool that assesses perpetration of relational violence. • Within 4 years, county agency officials will pilot test the data gathering tool that assesses relational violence • Within 5 years, our county agencies will administer the data gathering tool that assesses relational violence.	W 0 ithin 5 years, at least 75% of agencies collecting data relevant to primary prevention of relational violence will enter that data on Community Link or another such easily accessible site.	By 2013, an easily accessible system of collecting data will verify needs for services and form a basis for evaluation of preventive efforts. In addition, the knowledge of effective strategies that address common problems and reduce duplication of effort will be increased. With this improved and readily available information, the preparation of grant proposals and reports will be simplified

EVALUATION—The following results will be measured: Number of agencies entering data into *Community Link*; the usefulness of data as measured by the number of individuals using the entered data on *Community Link*.

DATA COLLECTION TOOL—Website tracking system.
